About BGZ brands

Visit [BGZ brands](#) for more Company information.

BGZ brands is a leader in device protection and is experiencing tremendous growth. We are looking for a standout Finance Systems Manager who shares our passion to provide the best products and the best service in the industry. Every member of our team plays a major role in our success, which we believe is very rewarding. Located near Thanksgiving Point in Lehi, we work hard and we play hard at BGZ brands.

About the Position

The Finance Systems Manager proactively supports and enhances critical business strategies through NetSuite/ERP administration, data management, general accounting, and reporting. This position reports to the Company Controller.

- Manage and maintain NetSuite ERP, as well as other finance tools and applications
- Develop, test, implement, and maintain system configurations and integrations as needed to meet evolving business requirements
- Manage vendor relationship with NetSuite/Oracle and other third-party providers of finance applications
- Maintain appropriate system access for end users, and support and train users as needed on system functionality and reporting
- Collaborate with end users to identify opportunities and develop solutions to leverage data that supports business decision-making and optimizes business processes
- Perform ad-hoc reporting and data queries as requested
- Execute ETL (extract/transform/load) data functions
- Perform reconciliations of ERP system data with subsystem/sub ledger data
- Troubleshoot and resolve system errors and data quality issues, irrespective of cause
- Maintain policies, procedures, and guidelines to ensure data integrity and security, including PCI compliance
- Assist with other general accounting, reporting, and IT support needs that may arise

Ideal Background and Culture Fit

- 2+ years of ERP administration in a finance function, as well as hands-on experience with a cloud-based ERP, preferably NetSuite

- Bachelor's degree in Accounting, MIS, IT Business/Computer Science, or related field
- Experience with the following a plus: SuiteApps, SuiteFlows, SuiteScripts, saved searches, data imports, dashboards, custom KPIs, customized reporting, e-commerce and 3PL connectors, and EDI
- Excellent MS Excel skills
- Demonstrated understanding of business processes and requirements, and of generally accepted accounting principles
- Ability and desire to excel in an intense, committed, rapidly changing environment with a talented growth company
- Confidence and drive to deliver results autonomously with minimal guidance
- Proactive and relentless in pursuit of solutions and process improvements, and in identifying and resolving root causes of system issues as they arise
- Highly analytical, detail-oriented, and focused on data accuracy and data integrity
- Excellent interpersonal and communication skills, with demonstrated ability to collaborate cross-functionally, lead project teams, and provide technical assistance and training
- Absolute integrity dealing with confidential business information
