

# BODYGUARDZ®

## PURE 2<sup>®</sup> EDGE

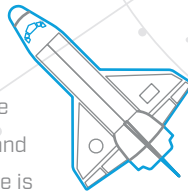

PREMIUM EDGE-TO-EDGE  
TEMPERED GLASS

- + Edge-to-edge protection
- + Aluminum-infused glass
- + Impact-absorbing adhesive technology
- + Thinner, stronger glass
- + Precision-cut edges
- + Case friendly

### Aluminosilicate

ə-loʊ'mə-nō-sil'i-kāt' / Al<sub>2</sub>O<sub>3</sub>

Aluminosilicate is a rare family of glass made from aluminum oxide—engineered to withstand high temperatures and shock. Aluminosilicate is the same glass used in space shuttle windows.

*BodyGuardz Pure 2 Edge builds upon our award-winning Pure 2 product by expanding coverage from edge-to-edge. Made of aluminosilicate, Pure 2 Edge has increased scratch resistance, reduced scratch visibility, and improved "after-scratch" strength compared to traditional soda-lime glass protectors.*
