PROVEN TO FIGHT BLUE LIGHT

According to The Vision Council, use of computers and mobile phones can result in eye strain, eye fatigue and headaches. The high-energy blue light wavelengths emitted from mobile devices can be the cause. Pure 2 EyeGuard filters out up to 43% of harmful blue light - protecting eyes from digital eye strain, and protecting devices from drops.

Light waves between 400 and 450 nm can be most harmful to eyes.
Pure 2 EyeGuard blocks up to 43% of these harmful light waves.
